

Possible Solutions

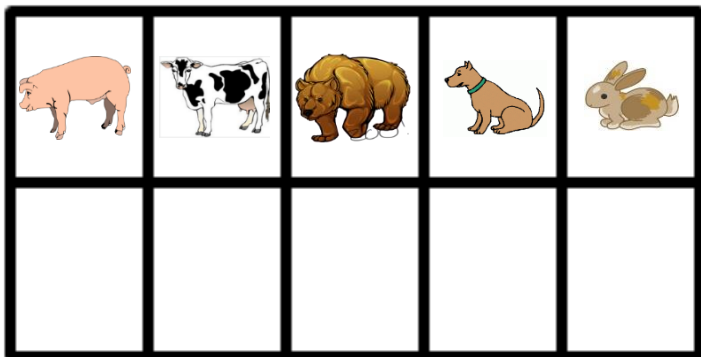

Read and answer the question by recognizing the number of animals shown in each ten frame.

How many flying animals do you see?

The student should say the number by instantly recognizing or seeing the quantity, such as 3, rather than having to count the number of objects.

How many nonflying animals do you see?

The student should say the number for the ten frame by instantly recognizing or seeing the quantity, such as 5, rather than having to count the number of objects.
