

Possible Solutions

- a) Circle the words that are true about all rectangular prisms.

Rectangular prisms can roll.

The faces of a rectangular prism are rectangles.

Rectangular prisms have 6 faces.

Rectangular prisms are made of wood.

Rectangular prisms are big.

- b) Explain your thinking about the words you did not circle.

Rectangular prism cannot roll because all of their surfaces are flat. Rectangular prisms do not have any curved surfaces.

Not all rectangular prisms are made of wood because they can be made of different things.

Not all rectangular prisms are big because they can be different sizes.
