**Possible Solutions**

a) Circle the digital clock that shows the time represented on the analog clock? Explain your thinking.

The time on the analog clock is 9:30 because the hour hand is pass the 9 and the minute hand is on the 6. That's half-way between 9 and 10.	The time on the analog clock is NOT 10:30 because the hour hand has not yet passed the 10.

b) Circle the analog clock that shows the time represented on the digital clock? Explain your thinking.

The time on the analog clock is NOT 2:00 because the hour hand is on the 12 and the minute hand is on the 2. The hands are reversed. This clock shows it is past 12:00.	The time on this analog clock is 2:00 because the minute hand is on the 12 and the hour hand is on the 2.
