

Bundled sticks are used to represent or model a number using place value.

Hundreds	Tens	Ones
The value of each large bundle is 100 because a large bundle is composed of 10 bundles of 10 sticks or 100 single sticks.	The value of each small bundle is 10 because a small bundle is composed of 10 single sticks.	The value of each single stick is 1.
		
$1 \text{ hundred} + 2 \text{ tens} + 5 \text{ ones} = 125$
