Hint

If you are going to place a mark 5/8 of the distance between 0 and 1, think about how many sections the number line will need. Will that be the 5 or the 8 from the fraction?

```
0                              1
|                              |
<——————————————————————————————>
|                              |
```
