

Possible Solutions

Write a problem situation for the following equation.

$$42 + x = 160$$

- In order to come up with a scenario, students must think about what the equation is saying.
- Below are a few scenarios or problem situations that might work with the given equation.
 - Beto was asked to collect \$160 for a school fundraiser. So far, Beto has raised \$42. How much more money does Beto need to raise?
 - A local church is hosting a charity run. They can only have 160 people enter the race. So far, 42 people have signed up. How many more people can sign up for the church run?
