

## Possible Solutions

- a) Robert earned \$30 for raking his neighbor's yard. He wants to save his money in his savings account. Would Robert make a deposit or a withdrawal?

Robert is putting money into his savings, so he is making a deposit.

- b) Patricia wants to give her sister \$20 for her birthday. When Patricia goes to the bank to get the money, would she need to make a deposit or a withdrawal?

Patricia is taking money out of her account, so she is making a withdrawal.

- c) Tina had a balance of \$400 in her savings account. She made a withdrawal of \$50. How much does she have in her savings account now? Draw a diagram and explain your thinking.

Withdraw means that Tina took money out of the bank, so I subtracted \$50 from \$400.

$$\$400 - \$50 = \$350$$

Tina has \$350 in her savings account now.

- d) Allen had a balance of \$250 in his savings account. He visited the bank and when he left his balance was \$300. Did Allen make a deposit or a withdrawal? Tell how you know.

Allen's balance in his savings account was larger when he left so he added money to his account or made a deposit.

$$\$300 - \$250 = \$50$$

Allen added \$50 to his account.
